EMPLOYMENT HISTORY

Front-End Developer, Sprout Solution, Ortigas City, NCR

*Jan 2024 - **Present***

- Frontend Developer specializing in **Vue 3, Knockout.js, TypeScript/JavaScript, Pinia and Tailwind CSS,** building scalable, high-performance web applications.
- Experienced in **REST API** integration, secure routing with **role-based access, feature flags, and migration** strategies.
- Contributed to shared **Design System Component Libraries using Vue, Vite, Playwright, and VitePress.**
- Led migration of legacy **Knockout.js applications to Vue 3**, improving performance and maintainability.
- Perform **API testing** and validation using **Postman**, ensuring reliability and accuracy of backend integrations.
- Actively participate in **Agile methodologies**, including **Sprint Planning and Daily Scrum facilitation**, contributing to **team alignment** and delivery efficiency.
- Utilize **Git** for version control, managing branching strategies, pull requests, and collaborative code reviews.
- Use **Node.js** as the runtime environment for frontend development.
- Manage multiple Node.js versions efficiently using **NVM** (Node Version Manager) to ensure compatibility across projects.
- Handle dependency management and project scripts using **Yarn**, **NPM**.
- **AI** tools such as **GitHub Copilot, Cursor,** and currently expanding expertise in Claude AI to enhance productivity and code quality.
- GIT Repositories: Github, Gitlab, Microsoft Azure.
- **Jira** for ticket Management.

Front-End Developer, UBx Philippines Corporation, Ortigas City, NCR   *June. 2021 – Jan 2024*

- Develops website and App for Marketplaces using Nuxt/Vue js.
- Used gitlab as project repository.
